

## **A PARENT'S TESTIMONIAL**

Our son was diagnosed as profoundly deaf when he was a few weeks old almost 13 years ago.

We didn't know anybody who was deaf or had ever met a deaf person. At a time when information was not as easily available as it is now via the internet, we were desperate to find out as much as we could about deafness.

A thoughtful friend introduced us to ABCD Cymru, who were very efficient in directing us to an appropriate organisation who could support us and give us the appropriate information regarding our sons hearing impairment.

ABCD have been a supportive organisation listening to the concerns of parents and trying their best to help in any way they could. Whether it was just to listen or give information.

We as a family have enjoyed the wonderful trips that ABCD have organised; they have given us the invaluable opportunity to socialise with other families from same and different backgrounds and disabilities. Thus being able to share experiences and give each other support.

We are very grateful to ABCD and would hope that this organisation has enough funding to carry on supporting families and continue this invaluable work.
